

EQUIPMENT MONITORS

SHOCKWATCH®

ImpactManager RF *ImpactManager ID*

The ShockWatch ImpactManager RF and ImpactManager ID are access control, impact and utilization monitoring devices for material handling equipment. These products are designed to reduce damage-related expenses due to improper operation, and to create a safer work experience.

When mounted to a forklift:

- Detect impacts and record event details (date, time, driver ID)
- Transmits data wirelessly for the RF or downloaded manually
- Controls access by ensuring that only trained or certified drivers are operating

ImpactManager SC

The ShockWatch ImpactManager SC is an impact detection device for forklifts and other material handling equipment. Mounted directly on the equipment, the ImpactManager SC utilizes a patented and adjustable sensor which sounds an alarm upon any impact exceeding a pre-defined threshold.

ImpactManager SC Models:

- **SC1000** self-contained; no wiring; internal alarm and 9V battery
- **SC1010** draws power from forklift battery; optimal for special operating temperatures
- **SC1040** 9V battery; allows integration of forklift accessories (i.e., horn and lights)
- **SC1060** powered by forklift battery; can use forklift accessories; ideal for loud facilities
- **SC1080** powered by forklift battery; uses a remote panel, housing the keyswitch and test switch controls for mounting

■ *Damage Prevention for Forklift Safety* ■ *Equipment Monitors*

Mounted directly to your equipment, ShockWatch Equipment Monitors ensure proper usage around the clock. By capturing data on all aspects of operation and actually controlling others, monitors enable you to manage operations like never before. The mere existence of monitors is enough to encourage your workforce to work smarter.

Operator accountability and quality information will soar, while costs due to accidents, misuse and untimely maintenance and repair will begin disappear.

Reduce the Costs of Material Handling Equipment

- Reduce costs of impact-related damage caused by equipments
- Ensure compliance with safety regulations
- Minimize downtime through optimal maintenance scheduling
- Positively change operator behaviour through accountability
- Create a safer workplace and minimize accidents and claims
